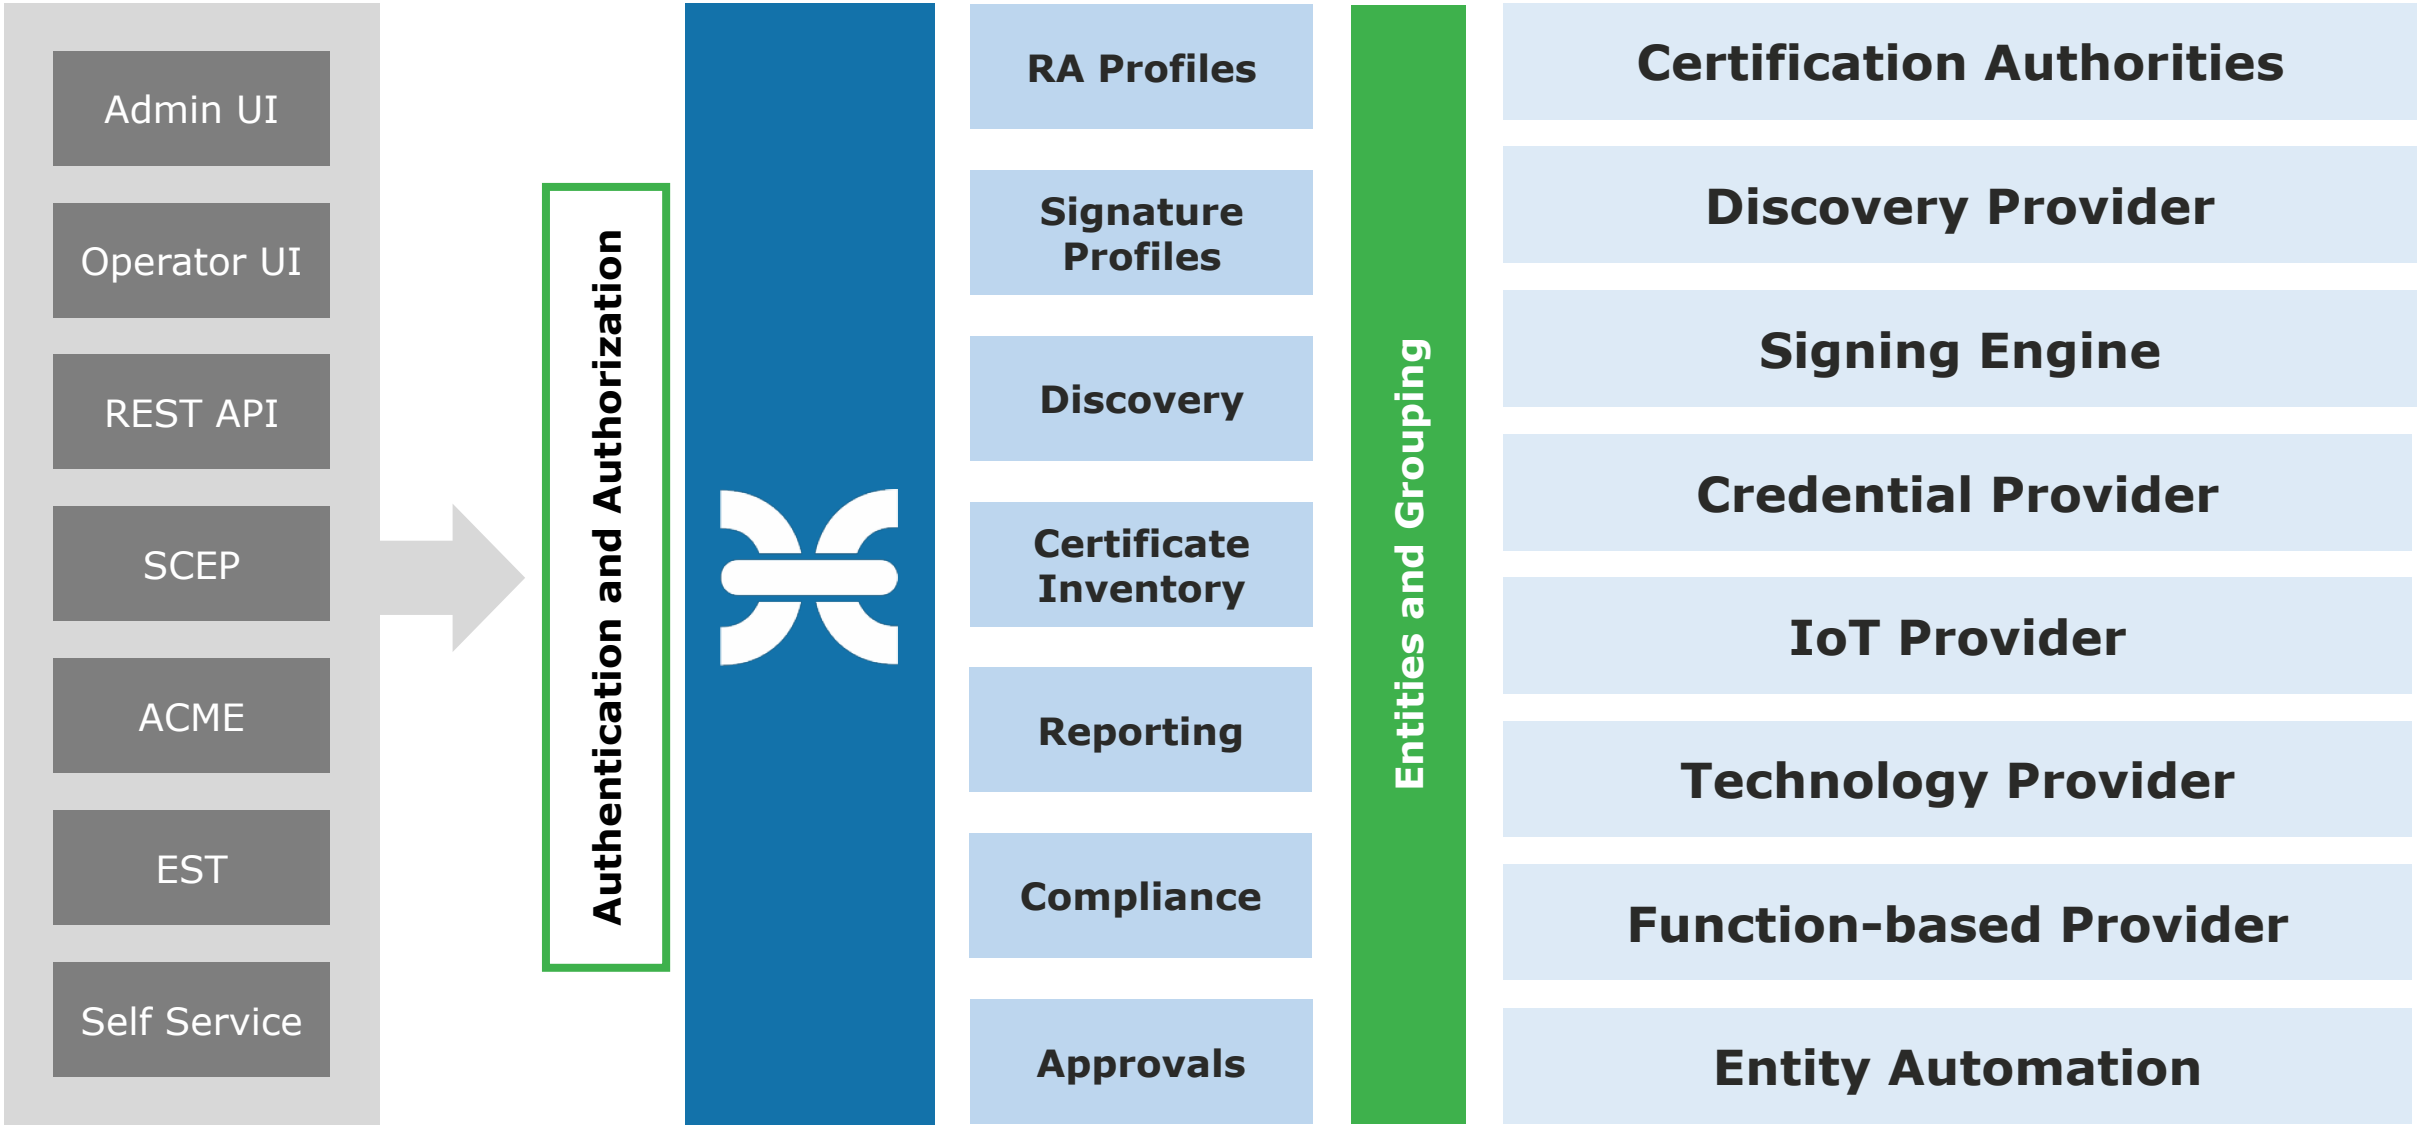
Can we heal your infrastructure?

It is not too late; your infrastructure can be healed!

CZERTAINLY

CZERTAINLY INGREDIENTS



CZERTAINLY BENEFITS

Service-based approach	**FLEXIBILITY**
Management of profiles rather than individual certificates	**EFFECTIVITY**
Automatically applied policies to manage certificates	**CONTROL**
Possibility of higher automation on the profile level	**AUTOMATION**
Instant propagation of all the changes on the profiles	**AGILITY**
Reduce the risk of incoherent certificate set up	**COMPLIANCE**
Monitor and report the certificate portfolio on profile level	**VISIBILITY**

CZERTAINLY

getinfo@czertainly.com

What is CZERTAINLY? Medicine for your infrastructure!

CZERTAINLY has been developed to deliver easy, user friendly and effective solution for efficient trust lifecycle management in the scenarios relevant for today and future technologies.

CZERTAINLY is a medicine for your infrastructure that cures and monitor health of your certificates, signatures, and cryptographic keys.

Service Based Approach

Provide a higher-level abstraction on top of PKI configuration using bundle of service attributes.

Fast integration of use-cases

Streamline integration procedures and reduce time and costs needed to enable clients to use certificates.

Abstraction of PKI tasks and agility

Change the service configuration on the fly, without impact on integrated clients, and trusted technology.

Easy maintenance of the PKI

Transparent behavior makes possible to maintain the PKI while using its services.

How to get you back on the track?

CZERTAINLY has a powerful certificate **discovery engine** that will find certificates within various **sources** and give you overall idea about **what is being used** in your infrastructure and applications.

Once you **know your certificates**, you can **plan ahead** and decide how they should be **managed**. **Design** your profiles to be used across the organization and services.

Implement and **automate** certificate management. Get rid of self-signed certificates and have a **proper control** about valid certificates. See the **overall improvement** of the infrastructure on dashboards.

Monitor infrastructure and **update** if necessary. Periodically run health **checks**, discovery, validation, and **maintenance**.

CZERTAINLY

Unsecure certificate disease is spreading rapidly.
10 of 10 professionals recommend **CZERTAINLY for a daily prevention!**

It is not too late; your infrastructure can be cured!

Basic SYMPTOMS

- Multiple service outages caused by unsecure certificate
- Never-ending time spent with the certificate management
- Certificate-phobia and fear from their existence
- Regular breach and failure of your immune system
- Tired and demotivated

CZERTAINLY reactions and effects

- **Reduced stress**
- **Longer and uninterrupted sleep**
- **Increased visibility and productivity**
- **Prevent health outages**
- **Contribute to your PKI hygiene**
- **Improved agility and customer experience**
- **Joy from the certificate management**

Your infrastructure can be healthy again,

CZERTAINLY!
